Shipping Hints

FILM It's a good idea to label each roll of film that you mail, in case it somehow gets separated from the mailer. If you have address labels that are small enough they work great. If not, just use a piece of masking tape and write your name and address on it and stick it to the roll.

NEGATIVES & PRINTS Be safe and use cardboard on both sides and tape or rubber band it together. It probably would be a good idea to write your name and address on the outside of this also.

MAILERS After sealing the mailers put a piece of tape across the flap for safety. Over the years we really have had few problems with the post office but sometimes we get surprised with how a package arrives here. **BE SAFE** and make your packaging a little stronger than it has to be.

Thank you for your business
